Memo to File

RE: Inspection of Industrial
Earth Products, Inc.
DOE/045/019
Tooele County, Utah

Tom Tetting and Susan Linner of the Division visited the site of this operation on September 16, 1982. It is located on the 7.5 minute topographic map, Delle Quad. Access is off of I-80 at the Delle exit. The first road to the right over the railroad tracks curves right around the Lakeside Mountains. The site is on the left after about 2 miles.

The actual site is less than 2 acres and is located within the confines of a small gully. Several small cuts have been made effectively scarring the hillside. Some cuts have been backfilled according to the plan but no reseeding was evident. Although not responsible for revegetation the operator originally did commit to reseeding and this did not appear to have been done. Natural growth is occurring and no problems were evident. The processing plant site was not located and no evidence of its past presence found.
